

## Reduce Storage Pain Automatically

Organizations now have billions of files. Each year, file data grows rapidly while IT budgets shrink. To compound the challenge, 80% of your files are completely inactive, so there is a significant portion of high-performance primary storage being wasted. Administrators and storage managers demand real-time file movement that is seamless to the end user into an inexpensive secondary storage tier.

### Proven Enterprise Solution Includes:

Manage archiving, tiering and backup with one system

Open architecture and no vendor lock-in

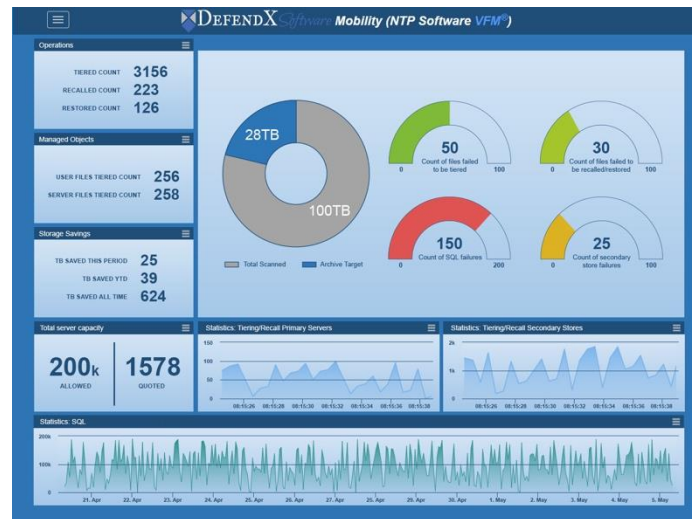

Automatically move files through a policy engine

## A Different Way to Help You

Our customers use our enterprise class archiving solution to support multiple data centers and thousands of users. We support these projects with a commitment to open solutions and not proprietary implementations. Administrators avoid having to configure multiple, independent solutions through many interfaces and reduce resources to manage file data. Ensure a proper backup through a single location.

# Your Control Station at Work

## Features and Benefits:

- Built-in simulations for archive planning
- Ensure proper backup through a single location
- Administrators set permissions and user abilities
- Granular policies to archive from specific locations or users
- Self-service with end user initiated tiering for files and folders
- Policy driven engine with "set it and forget it" reliability
- Real time so users can retrieve archive file via active stub
- Supports all major platforms with no compatibility issues
- Use cloud backup by leaving most current files on primary
- Collect extended metadata including author and dating
- Find files by name and directory with tape solution
- Clustered, fault-tolerant configurations are supported
- Stub portability with no rehydration necessary
- Scalable to petabytes of storage and billions of files

## Details About Your Success Partner

DefendX Software is the worldwide leader in the control and management of unstructured data. We work with blue-chip companies such as Dell EMC, NetApp, HDS, and Microsoft. With over 200,000 server licenses issued, and having over 20 million end users under management worldwide, DefendX Software is an innovative market leader providing enterprise products for the exploding file data market.
